SUMMARY

I am a Web Developer with strong skills in Laravel and WordPress, focused on building dynamic, scalable, and reliable web applications. I hold a degree in Informatics Engineering from UIN Sunan Gunung Djati Bandung and have gained practical experience through an internship at PTIPD UIN and various freelance projects.

My main strength lies in backend development with Laravel, along with building and customizing WordPress-based websites to meet specific needs. Recently, I've been applying Tailwind CSS for responsive UI and exploring React.js to deepen my frontend skills.

For me, technology is more than just a tool, it's a way to create real world impact through effective, user centered solutions. I'm committed to continuous learning and open to collaboration and new challenges.

Capabilities

- Programming Languages: PHP, JavaScript
- Web Development: HTML, CSS, WordPress
- Backend Development: Laravel (PHP), Node.js
- Frontend Tools & Libraries: React, Bootstrap, Tailwind CSS
- Database Management: MySQL, MongoDB, SQLite
- Version Control Software: Git
- API Testing Tools: Postman

WORK EXPERIENCE

Pyxis Digital Invitation

October 2021 – Present

- Developed and managed interactive digital invitation websites using WordPress & custom backend logic.
- Built custom themes and client-specific solutions.
- Handled SEO optimization and system integration.

Full-stack Web Developer (Intern)

February 2021 – February 2022

Centre for Information Technology and Databases (PTIPD), State Islamic University Sunan Gunung Djati Bandung

During this internship, I was fully responsible for the end-to-end development of multiple internal web applications that supported academic and administrative processes within the university.

Key Responsibilities:

- Designed and developed web-based systems using Laravel (PHP) for the backend and Bootstrap for the frontend interface.
- Built and maintained essential platforms, such as:
 - UIN Sunan Gunung Djati Cooperation System
 - Online Thesis Guidance System
 - UIN Sunan Gunung Djati New Student Registration System
 - Bank Paper UIN Sunan Gunung Djati
 - PTIPD UIN Sunan Gunung Djati Profile Website
- Developed and tested RESTful APIs using Postman to support data communication between modules and systems.
- Managed MySQL databases to ensure data consistency and performance.
- Collaborated with cross-functional teams to gather requirements and deliver solutions aligned with user needs.

PROJECTS

LTQ Markaz - Learning Management System (LMS)

October 2023 – December 2023

Designed the user interface of a Learning Management System (LMS) with a strong focus on modern aesthetics, usability, and clear navigation across all user types.

Key Contributions:

- Created wireframes and high-fidelity mockups for:
 - User onboarding & registration pages
 - Course browsing and enrollment
 - Admin dashboards and content management
 - Payment & transaction flow
- Ensured consistency in visual design and user experience across devices (responsive design).
- Collaborated with the development team to translate designs into functioning frontend interfaces.
- Focused on UI principles: clarity, accessibility, and user guidance to minimize user confusion.

POS Menu Transaction (Open Source)

June 2025 – June 2025

- Built a simple POS web application using Laravel for backend and Inertia.js (React) for frontend.
- Developed menu, order, and transaction features with dynamic UI.
- Link Project at [Github](#).

Education

Informatics Engineering (S.T.)

July 2018 – September 2024

GPA 3.45/4.0

UIN Sunan Gunung Djati Bandung , Bandung
